

TWILIO ACCOUNT:

The screenshot shows the Twilio Console interface. At the top, there's a navigation bar with the Twilio logo, account name 'My first Twilio account', trial status 'Trial: \$15.50', and a search bar. The main content area is titled 'Ahoy Ashwini, welcome to Twilio!' and includes a sub-header 'Learn to build your first SMS app by following these steps.' Below this is a five-step process flow: 1. Get a number, 2. Send your first SMS, 3. See an app demo, 4. Follow the tutorial, and 5. Scale your application. The first step, 'Get a Twilio phone number', is highlighted. It includes a diagram of a phone icon connected to a cloud icon, and text explaining that a virtual phone number is needed. A note states: 'While your account is in trial, you can get one free USA or Canadian phone number. To get local phone numbers outside of the USA or Canada, you may need to upgrade your account and meet [regulatory requirements](#).' A blue button labeled 'Get a Twilio phone number' is visible at the bottom of the step.

This screenshot shows the 'Account Info' section of the Twilio Console. It displays the 'Account SID' as 'ACc39396129b94d3f9bebb214d01d3c51b' and the 'Auth Token' as '95d71272689fe95a29948960e587b639'. There is a 'Hide' button next to the Auth Token. A warning icon and text state: 'Always store your token securely to protect your account. [Learn more](#)'. Below this, it says: 'You are on a trial account. You can only send messages and make calls to [verified phone numbers](#). Learn more about your [trial account](#).' To the right, there's a 'Helpful links' section with links for 'How does Twilio work?', 'SMS Quickstart guides', and 'Support help center'.
